## Invincible single-hearted unity ::

[2016-03-23]

The Korean revolution that has traversed as untrodden path started out and has won victory after victory on the strength of single-minded unity.

Whenever the revolution was confronted with hardship, difficulties and grave situation, the people made new history of miracles and victories by overcoming them by dint of the firm unity around the leader. ▶▶

## Nation's industrial production rises 1.2 times

Industrial output grows rapidly thanks to the heightened revolutionary enthusiasm and creative spirit of self-reliance and self-development of service personnel and people, who have risen up in the day-and-night march true to the call of the Central Committee of the Workers' Party of Korea for launching a 70-day campaign of loyalty for the Seventh Party Congress, according to a report of the Korean Central News Agency on March 12.

The nation's industrial production increased 1.2 times in the first ten days of March over the same period of last year.

The Pukchang and Pyongyang thermal power complexes and other thermal and hydropower stations across the country pressed on with power generation as scheduled, far exceeding the ten-day targets set by the Party.

Coal mines in the western areas including Tokchon and Sunchon cut thousands of tons of coal more every day.

The Ministry of Coal Industry overfulfilled the ten-day production plan by 13 per cent and the results of major and preliminary tunnelling far surpassed the plan, securing hundreds of reserve coal-cutting faces.

The workers of the Hwanghae Iron and Steel Complex doubled the Juche iron output over the same period of last year, and all metallurgical bases conducted a dynamic drive to increase iron and steel production.

Amidst the heated emulation and experience-sharing in iron ore mines in Musan, Unnyul, Thaethan and other areas, the Jaeryong Mine increased daily production over 1.5 times on average, thus taking the lead in the supply of concentrated iron ores to metallurgical factories.

The Ministry of Railways, all the railway bureaus and their branches commanded railway transport scrupulously and gave top priority to concentrated transport without accident to overfulfil the plan for main freight.

The increased production in the vanguard economic sectors injected a new lease of life into the overall major industrial sectors such as machine-building, chemical, building materials and mining industries and forestry.

The Taean Heavy Machine Complex completed the production of generating equipment till March 9 in a matter of two months and sent them to the construction site of Paektusan Hero Youth Power Station No. 3 on March 10.

The workers of the large machine-building bases in Ragwon and Ryongsong and the Sungni Motor Complex speeded up the processing of products and increased the production of spare parts including various kinds of gears and speed reducers, a great contribution to a 1.5 times rise in the production of thermal power generating equipment of the Ministry of Machine-building Industry.

The workers of the Hungnam Fertilizer Complex hit the Juche fertilizer production target for the first ten days of March.

Cement production is also growing in the Sangwon Cement Complex whose workers and technicians have turned out to break the production record again this year after last year.

Many forestry and prop production stations carried out their first quarterly and yearly timber production quotas.

Farming preparations were brisk on the agricultural front, resulting in a 1.7 and 2.8 times growth in the securing of hukposan and microbial fertilizers and an over 1.3 times increase in the acreage of field carpeted with humus soil.

Officials and fishermen carried out the plans of the Ministry of Fisheries for ten days 121 per cent.

Daily amount of catch increased rapidly and fishing results saw a leap in the fishery stations on the east and west coasts.

Hundreds of workers hit their targets for the first quarter and half of the year in the field of textile industry. Kumkhop, Pomhyanggi and Maebongsan and other popular brands saw a sharp rise in sales.

Many major construction projects progressed apace including those for Paektusan Hero Youth Power Station No. 3, reconstruction of Kim Il Sung Stadium, second-stage reconstruction of the Central Zoo, capacity buliup of the Central Tree Nursery of the Ministry of Land and Environment Protection, the central class education hall and Wonsan Army-People Power Station.

Many young people volunteered to work in labour-consuming fields and hundreds of workers carried out their yearly plans.
